Appendix 1. List of Studies Included

A1. Chang YY, Yu HH, Loh EW, Chang LY. The efficacy of an in-service education program designed to enhance the effectiveness of physical restraints. Journal of Nursing Research. 2016;24(1):79-86. https://doi.org/10.1097/jnr.0000000000000092

A2. Dauvergne JE, Ferey K, Croizard V, Chauvin M, Mainguy N, Mathelier N, et al. Prevalence and risk factors of the use of physical restraint and impact of a decision support tool: A before-and-after study. Nursing in Critical Care. 2024;29(5):987-96. https://doi.org/10.1111/nicc.12945

A3. Ding Y, Wang G, Chen H, Kang J, Wu Z. Application effects of SBAR communication mode in ICU nursing physical restraint shift. Alternative Therapies in Health and Medicine. 2022;28(6): 112-7.

A4. Hevener S, Rickabaugh B, Marsh T. Using a decision wheel to reduce use of restraints in a medical-surgical intensive care unit. American Journal of Critical Care. 2016;25(6):479-86. https://doi.org/10.4037/ajcc2016929

A5. Hurlock-Chorostecki C, Kielb C. Knot-So-Fast: A learning plan to minimize patient restraint in critical care. Dynamics. 2006;17(3):12-8.

A6. Johnson K, Curry V, Steubing A, Diana S, McCray A, McFarren A, et al. A non-pharmacologic approach to decrease restraint use. Intensive and Critical Care Nursing. 2016;34:20-7. https://doi.org/10.1016/j.iccn.2015.08.004

A7. Kang J, Kim S, Lee M, Na H. Impact of the restraint decision tree for physical restraint use in South Korean neurointensive care units. Nursing in Critical Care. 2024;29(5):1110-8. https://doi.org/10.1111/nicc.13123

A8. Kim YH, Jeong YS, Park JH, Yoon SH. The effects of nurse education on physical restraint use in the ICU. Korean Journal of Anesthesiology. 2008;55(5):590-5. https://doi.org/10.4097/kjae.2008.55.5.590

A9. Kirk AP, McGlinsey A, Beckett A, Rudd P, Arbour R. Restraint reduction, restraint elimination, and best practice: Role of the clinical nurse specialist in patient safety. Clinical Nurse Specialist. 2015;29(6):321-8. https://doi.org/10.1097/nur.0000000000000163

A10. Kwak KS, Kim SE, Bae EK, Lee ES, Lee EH, Choi YJ, et al. Decreasing the application rate of unnecessary physical restraint through the establishment of a guideline for restraint application. Journal of Korean Society of Quality Assurance in Health Care. 2009;15(2):93-103.

A11. Lynn LL, Brookes JM. Changing perceptions of physical restraint use in the ICU. Nursing Critical Care. 2017;12(6):41-4. https://doi.org/10.1097/01.CCN.0000521939.91085.6f

A12. Miller BR, Leppert LM, Tucker ED, Webster B, Maye KA, Steffan NM. Physical restraint reduction in the trauma intensive care unit: A quality improvement initiative. Jounal of Trauma Nursing. 2025;32(3):150-6. https://doi.org/10.1097/JTN.0000000000000854

A13. Yang Y, Wu J, Qian H, Xu H, Chen X, Lu L, et al. Clinical application of evidence for reduced physical restraint with ICU adult catheterized patients: A stepped-wedge randomized controlled trial. International Journal of Clinical and Experimental Medicine. 2023;16(2):15-30.

A14. Yeh SH, Hsiao CY, Ho TH, Chiang MC, Lin LW, Hsu CY, et al. The effects of continuing education in restraint reduction on novice nurses in intensive care units. Journal of Nursing Research.

2004;12(3):246-56. https://doi.org/10.1097/01.jnr.0000387508.44620.0e

A15. Yeo JM, Park MH. Effects of on education program for nurses on the use of restraints. Journal of Korean Academy of Nursing. 2006;36(3):532-41.
